

Kaylee (Li) Wan

San Francisco, CA | liwan@berkeley.edu | [linkedin.com/in/kayleewan](https://www.linkedin.com/in/kayleewan) | (503) 317-7693

Business Analyst | Operations Analyst | AI & Automation

Summary

Data-driven UC Berkeley Data Science graduate (GPA: 3.83) with expertise in Python, SQL, Excel, ETL pipelines, and AI workflow automation. Developed AI agents, dashboards, and statistical analysis pipelines that transformed raw data into executive-ready insights across healthcare, e-commerce, and research. Track record of leading cross-functional collaboration, operational transformation, and delivering measurable business impact.

Education

University of California, Berkeley

Berkeley, CA

Bachelor of Arts in Data Science (Business Analytics) | GPA: 3.83/4.0

Graduated Dec 2025

Coursework: Business Analytics, Data Engineering, Data Mining, Machine Learning, Discovering Design

Awards: Jack Kent Cooke Scholar (Top 6.5% Nationwide, \$137K) | Western Union Global Scholar (Top 40 Globally, \$10K)

Experience

UC San Francisco (UCSF), Neuroscape Research Lab

San Francisco, CA

Research Data Analyst

Oct 2025 – Present

Featured project: Evaluating VR vs. tablet-based cognitive training on attention and academic outcomes (N=158 children)

- **Reduced data noise by 80%** by engineering an ETL pipeline in Python on a 28K-row VR cognitive training dataset
- Identified data quality issues and communicated findings to the lab director, leading to a cross-functional investigation with data collection partners and revised analysis objectives
- Developed an interactive HTML analytics dashboard (Claude-assisted) enabling researchers to explore longitudinal participant progress, treatment groups, game performance, and study metrics through dynamic visualizations
- Performed t-tests and ANCOVAs in SPSS to compare VR vs. tablet cognitive training outcomes across 158 participants

Wayfair (via Extern)

Remote

AI Agent & Automation Extern

Jul 2026 – Aug 2026

- Developed **5 end-to-end AI agents** in n8n automating trend discovery, competitor benchmarking, and content generation for Wayfair's Rugs category, replacing manual research workflows
- Built a multi-source data pipeline (Amazon, Walmart, Instagram, Pinterest, industry blogs) feeding LLM agents (OpenAI, Claude, Gemini) to detect emerging rug trends and quantify competitor pricing/assortment gaps; when image-rendering node failed mid-run, diagnosed root cause by isolating the broken component and rebuilt the affected workflow
- Delivered a centralized Google Sheets market-intelligence dashboard consolidating trend, competitor, and content-strategy outputs into a single decision-support tool for category teams

Amazon Fulfillment Center (via Extern)

Remote

Operational Strategy & People Analytics Extern

May 2026 – Jul 2026

- Quantified **59% of reported departures** within first year by analyzing 147 employee feedback entries (Glassdoor, YouTube) via Python and Claude AI through sentiment analysis and job-title segmentation
- Identified Scheduling and Physical Exhaustion as primary attrition drivers through root-cause analysis; recommended improvements to injury reporting and productivity-safety metrics

Appa Health

Berkeley, CA

Data Analyst Intern

Sep 2025 – Dec 2025

- Analyzed **2,100+ outreach records**, surfaced key metrics including **54% no-response rate**, modeled weekly contact targets to hit enrollment goals, and flagged outreach inconsistency as a risk; delivered **4 presentations** to CEO and Project Lead
- Audited end-to-end sign-up flow and identified UX blockers reducing conversion; proposed form redesign and A/B testing framework for mentor video variations to improve teen engagement

UC Berkeley, Berkeley International Office

Berkeley, CA

Lead Orientation Leader

Aug 2024 – Jul 2026

- Coordinated onboarding logistics for **1,000+** international students across multiple cycles; served as primary OL team liaison, reallocated personnel across stations in real time, and proposed a structured small-group assignment system — **adopted program-wide**

Skills

Languages & Tools: Python, SQL, Excel (MO-211 Certified), Google Sheets, Tableau, Power BI, SPSS

AI & Automation: Claude Code, Codex, Gemini, n8n, Prompt Engineering, Multi-Agent Systems, Workflow Automation

Methods: ETL, Statistical Analysis, Root Cause Analysis, A/B Testing, Data Visualization, Stakeholder Communication
